ISLAND OF CUBA.

TO INVALIDS AND PERSONS OF DELIAND.—HAVANA, December 15, 1841.—It has long been a matter of regret to the inhabitants of this city, that, on the arrival of invalids from the United States with letters of introduction, if has never been in their that, on the arrival of invalids from the United States with letters of introduction, it has never been in their power to recommend them a suitable residence in the country. It has therefore been necessary for such persons, either to take up their abode in the hotels in town, where the noise and bustle of a crowded city, and the want of the pure atmosphere and calm retirement of a country life, prevent their deriving that benefit from the change of climate which they naturally expect, or they are compelled to go to places in the country where no adequate preparations have been made for receiving them, and where the apartments, accommodations, and manner of living, are in no wise calculated for persons in a delicate state of health.

From a due consideration of this want, and of the

From a due consideration of this want, and of the From a due consideration of this want, and of the great benefit that would be derived by invalids who seek to regain that health in the mild and bepeficent climate of Cuba, if a suitable abode should be provided for them, the subscriber, a medical practitioner long established in this city, has appropriated his beautiful coffee estate called the Bueña Esperanza, situated in the most healthy and romantic part of the country, so as to form a residence equally agreeable and attractive. In order to carry out this intention to the fullest extent that professional knowledge and a long experience of the effects of tropical climates could attain, no pains have been spared to form an establishment, which affords to the invalid, as well as to the healthy visiter, every rational enjoyment that can be derived from dwelling in the mildest climate, surrounded by the most picturesque vegetation. The to the healthy visiter, every rational enjoyment that can be derived from dwelling in the mildest climate, surrounded by the most picturesque vegetation. The grounds, laid out in the beautiful style of a coffee estate, comprise about five hundred acres. The Bueña Esperanza is situated on the south side of the islands, and is thus, in a great measure, sheltered from the chilly winds which now and then blow from the north during the winter months. The district in which it lies has been, from its extreme beauty, termed the Windsor of Cuba. The house has been built with every attention to those comforts so indispensable to invalids, and of which the buildings of this country are so destitute. All the rooms have boarded floors and glass windows. The establishment is on the footing of that of a private family, of which the guests form part, making themselves quite at home, and without being confined to those regulations which are necessary at hotels. In this establishment the invalid has it in his power to vary his amusements, by walking in the shady avenues of mango and palm trees, riding on horseback or in a volante, or visiting the neighboring estates, so thickly spread through the populous country. A large sugar estate close at Hand, affords an opportunity of drinking the hot cane juice, while the surrounding woods furnish amusement to the sportsman. The Bucha Esperanza is situated about thirty-five miles southwest of Havana. The route, which crosses a most lovely country, is as follows: From Havana to Bejucal, fifteen miles on railroad; from Bejucal to Buena Esperanza, twenty miles on a carriage road. It occupies about five hours. By application to the subscriber at his residence in Havana, N. 0.5 OBelilly street the next can be forwarded to

EDWARD FINLAY, M. D.

Calle de O'Reilly, No. 95.

I have visited and spent a short time at the estate of Dr. Finlay, described in the above letter, and most fully concur in every statement there made as to the Buena Esperanza. It is not surpassed for beauty of scenery and a healthy location by any place which I have seen in Cuba, and the invalid will find the numerous family of Dr. Finlay most agreeable and intellectual; and the English, French, and Spanish languages are all spoken by several members of the family.

WASHINGTON CITY, THURSDAY, JUNE 9, 1842.

A MERICAN CROWN WINDOW GLASS manufactured in the village of Redford, county of Clinton, and State of New York.

To the Redford Crown Glass has been awarded the first Premium of the American Institute in the city of New York for five successive years, and has received a gold medal in commendation of its superior merits.

This Glass is made from white flint sand, obtained in the vicinity, when works and is the only Crown in the vicinity, when works and is the only Crown.

in the vicinity ... be works, and is the only Crowing Glass made from that species of sand. It is capable of standing every change of climate, nor will it lose

of standing every change of climate, nor will it lose its lustre by age.

The Redford and Saranac Crown Window Glass are distinguished from ordinary Glass by the uncommon evenness and beauty of surface, the superior transparency and lightness of color, the great thickness, and the general excellence of the materials which compose them. The surface not being polished after being blown, retains the enamel, brilliancy, and hardness, and is not subject to the objection so often applied to Plate Glass, of being easily defaced and permanently bedimmed by dust; being made of extra thickness, will, without injury, withstand violent winds, hail storms, jars of cannon, &c. Its use, in the end, will prove more economical, independent of its adding so much to the beautiful appearance of buildings.

in the end, will prove more economical, independent of its adding so much to the beautiful appearance of buildings.

Specimens of this deservedly popular Glass may be seen in the New York Exchange and Custom House, Howard's Hotel, Bronson's Buildings, Broadway, Centre Market, and a great many private residences and stores in various parts of the city; also, in the Exchange and Custom House, Boston; Girard College, Philadelphia; Exchange Hotel, Baltimore; in the public buildings at Washington city; the Capitol at Raliegh, North Carolina, and in many both both public and private edifices throughout the United States. It has been used in a great number of steamboats and rail road-cars, and given entire satisfaction. It is believed that the above will suffice to prove that this Glass stands pre-eminent, and that it deservedly merits the approbation of builders and consumers of Glass.

The Saranac Crown Glass is most used in stores and buildings of the second order, green houses, &c. where strength and clearness are particularly desired, and will range about 33 d per cent. cheaper than Redford. The double thickness is always used for light-honses, and is taken by the true economist for sky lights, steamboats, ships' cabin windows, &c.

Ground Glass for sky lights, churches, and artists' windows, furnished to any pattern or size. The Glass is carefully packed in stout boxes, nailed, and secured so as to be transported with safety to any part of the United States.

For the more complete satisfaction of persons at a distance, who may not have an opportunity to examine this beautiful article, the following testimonials are respectfully offered for consideration.

Extract from the report of the committee of the American Institute, October, 1837:

"For richness of lustre and brilliancy of surface, as well as thickness and strength, the Redford Glass is the most beautiful article of the kind that has ever fallen under our notice, either of domestic or foreign production; and it alfords a proud specimen of the skill and ent

J. EVANS SNODGRASS, Editor.

The "Visiter" is the only literary family paper published in the State of Maryland, and enjoys a wider circulation than any other paper in Baltimore.

The first number of the twelfth volume was issued on the 15th of January, 1842. To those who have found this paper a welcome Visiter for eleven years, it is annecessary to describe it. For the benefit of others, we may just hint, that it is a LIRGE F.I.M.

ILY NEWSPAPER, devoted to Morals, Science, Literature, and General Information, including a due quantity of Agricultural facts, gleaned from the best agricultural publications of this country and Europe. It contains Foreign and Home Correspondence, Essays, Poetry, Tales, &c., &c., written expressly for the paper by the pens of some of the most popular writers in America. The productions of the ablest Authors in Europe also, will be found in its pages.

The following are among the contributors to the "VISITER."

Troy.

Stages and steamboats run every half hour to and from Troy and Albany, and to suit the arrival and departure of the cars.

Passengers going North of the Springs, will find stages to convey them to Lake George, Whitehall, and intermediate places, connecting with all the principal Northern and Eastern routes. Either of the runs will take passengers in time to reach the Lake Champlain boat.

The arrangement between Whitehall and Saratoga is new, and much more pleasant and expeditious than heretofore. It is by stages to Dunham's Basin, near Sandy Hill, and thence in packet boats to Whitehall, thus avoiding the rough part of the road.

Returning—leave Whitehall on arrival of Champlain boat, by packet boat to Dunham's Basin, and thence to Saratoga in stages, to arrive in time for the cars.

POETS AND POETRY OF AMERICA.

JUST published by CARY & HART, Philadelphia.

The Poets and Poetry of America, with an Historical Introduction, by Rufus W. Griswold, in one large octavo volume, handsomely printed on fine paper, and illustrated by portraits of Bryant, Sprague, Longfellow, Dana, and Halleck, and a beautiful vignette.

"This is the most valuable publication of the season. No collection of American Poetry has ever been made at all comparable to this, whether we regard the completeness of the work, or the taste displayed in the selection. The work comprises selections from eighty-eight of our Poets, whose productions are prefaced by neat biographies; and in an Appendix are contained selections from various Authors who, without pretending to the rank of Poets, have yet written occasional verses. Where the poet has published an edition of his own works, the selec thors who, without pretending to the rank of Poets, have yet written occasional verses. Where the poet has published an edition of his own works, the selections are comparatively few; but where the author has left his works to take care of themselves, the extracts have been more voluminous. This is a praise-worthy feature, since it preserves for us in a collected form, the works of Whittier, Sprague, and others. The longest poems of Drake, Sprague, and Whittier appear in this collection. We dismiss this national work with the assurance, that every American who loves his country's muse, will possess himself of an early copy."—Saturday Post.

MEMBERS OF CONGRESS.—To give those IVI gentlemen an opportunity to possess a copy of hat estimable work, McCULLOGH'S COMMER-CIAL DICTIONARY, the publisher has left a few copies for that purpose at Stationer's Hall, only until next Saturday.

DATENT VAPOUR BATHS-For the safe and PATENT VAPOUR BATHS—For the safe and convenient external application of sulpher and other irrespirable gases, vapour from herbs, &c., to the human system, to which the lungs are not only defends ed from any irrespirable vapour that maybe used, but are from exhalations discharged through the pores from all parts of the body, by profuse perspiration; to which they are exposed when the head is inclosed in the usual way. A practice always offensive, in some diseases dangerous, and quite unnecessary, as any desired vapour can be inhaled in these apparatus, without this loathsome accompanyment. In these applications will be found a powerful, yet safe, general auxiliary to the efforts of the physician for the removal of disease, but particularly so in diseases of the skin. disease, but particularly so in diseases of the skin, in rheumatic and gouty affections, and after the use of any mercurial preparation.
